INTRODUCTION

The Court’s Order instructs the Parties to address the original public meaning of three specific phrases in the Second Amendment: “A well regulated Militia”; “the right of the people”; and “shall not be infringed.” Order at 1. The Supreme Court has already answered the first two of these questions. *District of Columbia v. Heller* held that the original meaning of the phrase “a well regulated Militia” refers to “all able-bodied men,” and that the “right of the people” protected by the Second Amendment’s original public meaning is “an individual right to keep and bear arms” that presumptively “belongs to all Americans.” 554 U.S. 570, 579, 581, 595, 596 (2008). These conclusions about the Second Amendment’s original meaning are a binding part of *Heller*’s core reasoning, and this Court has no authority to depart from them.

Heller does not definitively determine the original meaning of the Second Amendment’s command that the rights it protects “shall not be infringed,” but its meaning cannot be in doubt. In 1791, as today, the command that an action “shall not” be taken imposed a mandatory duty. And in 1791, as today, an “infringement” of a right encompassed a variety of restrictions short of an absolute ban or destruction of the right. Taken together, there can be no question that the original public meaning of this Second Amendment phrase encompasses—and forbids—the restrictions on firearm acquisition imposed by California in this case.

The “data yielded from corpus linguistics,” Order at 2, are consistent with these conclusions. While the corpus linguistics methodology has been hailed by a few as bringing the “Big Data revolution” to constitutional interpretation,¹ the method is subject to several significant weaknesses that call its usefulness into serious question. The methodology’s central analytical move is a “frequency analysis” that is based on the undefended, and indefensible, assumption that just because an ambiguous word is used *more frequently* to convey one among two or more possible meanings, that must be *the correct* original public meaning. Further, there is no guarantee that the “corpora,” or collections of texts, that the method relies upon are adequately representative of actual language use. And further still, while the purportedly “quantitative” nature of corpus linguistics analysis gives the method a patina of empirical rigor, at its core the methodology rests on the same, irreducibly subjective intuitions about language meaning as the ordinary process of interpretation.

We have conducted a corpus-linguistics analysis of the three phrases identified by the Court, and we set forth the results below—results that are fully consistent with the conventional evidence of the original public meaning of those phrases (and with the determinations in *Heller*). Because of the weaknesses inherent

in the methodology of corpus linguistics, however, it ultimately sheds little light on the matter—and it certainly can do nothing to upset the interpretation of the Second Amendment adopted by binding Supreme Court precedent.

ARGUMENT

I. The original public meaning of the Second Amendment establishes that the challenged restrictions are unconstitutional.

A. “A well regulated Militia.”

In *Heller*, the Supreme Court adopted an explicitly originalist approach to the Second Amendment, interpreting its words to have the meaning that “would ... have been known to ordinary citizens in the founding generation.” 554 U.S. at 577. One of the phrases that *Heller* addressed is the Second Amendment’s reference to “A well regulated Militia.” Based on “founding-era sources” (and prior Supreme Court precedent), the Court held that “the Militia comprised all males physically capable of acting in concert for the common defense,” and that “the adjective ‘well-regulated’ implies nothing more than the imposition of proper discipline and training” on those engaged in militia service. *Id.* at 595-97 (cleaned up).

From this “unorganized” body comprised of “every able-bodied man,” the Government had power to call forth “a subset” of the general militia and “organize the units that will make up an effective fighting force.” *Id.* But *Heller* makes clear that the original meaning of the Second Amendment does not protect *only* those “state- and congressionally-regulated military forces” that have been called forth. *Id.*

It also, and centrally, prevents the Government from tyrannically “eliminat[ing] a militia consisting of all the able-bodied men” by “disarm[ing] the people.” *Id.* at 592, 598; *see also id.* at 578 (prefatory clause “does not limit . . . the scope of the operative clause”).

Heller’s interpretation of the phrase “well regulated Militia” is binding. The case’s central holding is that the Second Amendment “guarantee[s] the individual right to possess and carry weapons in case of confrontation.” *Id.* at 592. And the Court’s interpretation of the phrase “well regulated Militia” in the Amendment’s “prefatory clause” is a necessary and important part of the *ratio decidendi* of the case—“the logical chain of conclusions announced” by the Court as a justification for its holding. *Liverpool & G.W. Steam Co. v. Phenix Ins. Co.*, 129 U.S. 397, 439 (1889). It is thus binding unless and until overruled by the High Court itself. *See Seminole Tribe of Florida v. Florida*, 517 U.S. 44, 67 (1996).

Heller thus definitively settles that the original meaning of the Second Amendment’s reference to “A well regulated Militia” protects both any specific “organized militia[s]” as well as the general militia that “consists of all able-bodied men.” 554 U.S. at 596. And the historical evidence set forth in our prior briefs shows that *both* the “unorganized” *and every organized militia* in Founding-era America *included 18-to-20-year-olds*. *See* Opening Br. 21-24.

B. “The right of the people.”

Heller also conclusively determined “the original public meaning of the Second Amendment phrase[] ... ‘the right of the people.’ ” Order at 1. Based on usages of that phrase elsewhere in the Constitution, the Supreme Court held that the term “the people” “unambiguously refers to all members of the political community, not an unspecified subset,” and that the phrase “the right of the people” as a whole refers to a right that “is exercised individually and belongs to all Americans.” 554 U.S. at 580-81. Once again, with respect, this Court has no power to adopt a different interpretation of these words.

Law abiding 18-to-20-year-olds are thus plainly part of “the people,” as defined by *Heller*, for they are a part of the group of “all Americans.” *Id.* at 581. That also necessarily follows from the historical fact, noted above, that 18-to-20-year-olds were part of the militia at the Founding. As *Heller* explains, the Second Amendment phrase “the people” protects a *broader* category of individuals than “the Militia”—which “consisted of a subset of ‘the [P]eople’ ” comprised of “those who were male, able bodied, and within a certain age range.” *Id.* at 580. Since 18-to-20-year-olds were within the “subset” of militia members, they logically must also have been within the broader set of “the people” as a whole. *Id.*

C. “Shall not be infringed.”

The original public meaning of the third phrase identified by the Court—“shall not be infringed”—is also clear, and it clearly proscribes the type of restriction at issue in this case.

Founding-era historical materials demonstrate that then, as today, to “infringe” a right encompassed a wide variety of restrictions or limitations more subtle than a complete ban. Samuel Johnson’s celebrated 1773 dictionary, for example, defined “to infringe” as including not only “to destroy” but also to “violate,” “break,” or “hinder.”² Noah Webster’s 1806 Dictionary similarly defined it as “to violate, break, transgress.”³

Leading Framers used the word in just this way. The Founding generation frequently characterized state debtor-relief measures—short of actual debt cancellation—as “infringing” the rights of creditors. During the 1787 constitutional convention, for instance, Madison complained that “[t]he rights of individuals are infringed by many of the state laws—such as issuing paper money, and instituting a mode to discharge debts differing from the form of the contract.”⁴

² “*Infringe*,” in 1 SAMUEL JOHNSON, A DICTIONARY OF THE ENGLISH LANGUAGE (1773).

³ “*Infringe*,” in NOAH WEBSTER, A COMPENDIOUS DICTIONARY OF THE ENGLISH LANGUAGE (1806).

⁴ 1 MAX FARRAND, THE RECORDS OF THE FEDERAL CONVENTION OF 1787 327 (1911).

Similarly, Alexander Hamilton, writing in 1795 in support of the Jay Treaty, explained that the “legal impediments” States had imposed on the collection of debts to British lenders “infringe the rights of creditors.”⁵

Further evidence comes from *Nunn v. State*—a case *Heller* quoted, extensively relied upon, and praised as an opinion that “perfectly captured the way in which the operative clause of the Second Amendment furthers the purpose announced in the prefatory clause.” 554 U.S. at 612. In *Nunn*, the Georgia Supreme Court described the Second Amendment’s phrase “shall not be *infringed*” as meaning that the right protected by the provision could not be “curtailed, or broken in upon, in the smallest degree.” 1 Ga. 243, 251 (1846).

Historical materials likewise indicate that the original meaning of the word “shall” conveyed a mandatory requirement, meaning “to be obliged . . . [I]t is a duty, it is necessary.”⁶ As Justice Story explained in *Martin v. Hunter’s Lessee*, the word “shall” is distinct from “may” in having “mandatory,” “obligatory force” that “is so imperative” that its breach would be “a violation of . . . duty.” 14 U.S. (1 Wheat.) 304, 327 (1816).

⁵ “*The Defence No. XIV*,” Sept. 9, 1795, in 19 THE PAPERS OF ALEXANDER HAMILTON 245 (Harold C. Syrett ed., 1973), available at <https://bit.ly/3rHxBjh>.

⁶ “*Shall*,” in 2 NOAH WEBSTER, AN AMERICAN DICTIONARY OF THE ENGLISH LANGUAGE (1828).

Taken together, then, the original public meaning of the Second Amendment’s command that the rights it protects “shall not be infringed” is clear: the Government is under a mandatory duty to not restrain, impede, hinder, or curtail in the smallest degree the individual right to keep and bear arms. For the reasons set forth in our prior briefs, California’s restrictions prohibiting virtually all 18-to-20-year-olds from acquiring most firearms obviously constitutes an impermissible infringement, within the original meaning of this language.

II. The methodology of corpus linguistics suffers from several fatal conceptual difficulties that make it an unreliable guide to the original public meaning of the Second Amendment.

The Court’s March 26 Order next instructs the parties to address whether “the tool of corpus linguistics help[s] inform the determination of the original public meaning of th[e]se Second Amendment phrases.” Order at 1. Even setting aside the dispositive point that the original meaning of the first two phrases is conclusively resolved by *Heller*, while the corpus linguistics method may or may not have some valid uses, it suffers from several conceptual limitations that fatally undermine the recent efforts by some to use the method to determine the Second Amendment’s original public meaning.

A. Legal corpus linguistics’ central methodological tool, the “frequency hypothesis,” is unsound.

The central tool of legal corpus linguistics is the “sense differentiation” analyses of words or phrases, which codes a large number of uses of the word or

phrase at issue and then compares the number of times it is used in one or another potential sense—with the ultimate goal of finding one sense used in a great enough proportion of cases that it can be declared the “correct” meaning. Corpus linguistics proponents have called this “the most important tool” and the “meat-and-potatoes of determining meaning from corpus analysis,”⁷ and it was the key move made by the recent “Corpus Linguistics Professors” *amicus brief* filed in the Supreme Court’s most recent (abortive) foray into the Second Amendment.⁸

This key tool relies on what Professor Donald Drakeman has called the “frequency hypothesis”—the assumption that “the single meaning for constitutional purposes is the one appearing in the dataset the greatest number of times.”⁹ And the root difficulty is that this premise is fundamentally contrary to the way we use language.

A central feature of the English language is that many words have different meanings or shades of meaning—what linguists call the phenomenon of “lexical” or

⁷ Thomas R. Lee & James C. Phillips, *Data-Driven Originalism*, 167 U. PA. L. REV. 261, 308-09 (2019).

⁹ Donald L. Drakeman, *Is Corpus Linguistics Better Than Flipping A Coin?*, 109 GEO. L.J. ONLINE 81, 94 (2020)

“semantic ambiguity.”¹⁰ The phenomenon is too familiar to need elaboration. Consider the words “left” and “ball.” “Left” can refer to the direction (the opposite of “right”) or to being abandoned (“left behind”). “Ball” can refer to the spherical object used by children or in sporting events or to a social event that generally includes dancing.

Importantly, not only do many words, like these, have multiple valid meanings, but the particular sense of a word meant in a particular use of language *cannot* be determined simply by looking for a majority use across a collection of texts. A corpus linguistics analysis of modern American English would almost certainly show that the sense of “ball” referring to the spherical object overwhelmingly predominates the sense referring to social galas. But that is *not* because the roundish-tangible-object meaning of “ball” is the *correct* one; it is because modern people *spend a good deal more time writing and talking about sports than elite social gatherings*.

Thus, the nose-counts tabulated by corpus linguistics tell us *nothing* about how ambiguous words are being used on any given occasion. As *Heller* itself explained, “the fact that [a] phrase was commonly used in a particular context does not show that it is limited to that context.” 554 U.S. at 588. The meaning of an

¹⁰ See Lawrence B. Solum & Cass R. Sunstein, *Chevron As Construction*, 105 CORNELL L. REV. 1465, 1472-74 (2020); see also TIMOTHY A.O. ENDICOTT, VAGUENESS IN LAW 54 (2000); STEPHEN ULLMAN, SEMANTICS 156-92 (1962).

ambiguous passage using the word “ball” in a modern, Jane-Austen style novel simply could not be settled by pointing to its predominant meaning in the corpus of other contemporary texts. Instead, the ambiguity would have to be settled in the familiar way that language users have resolved ambiguity for centuries: by *examining the passage’s context*.

The Supreme Court has explained time and again that “[t]he meaning—or ambiguity—of certain words or phrases may only become evident when placed in context.” *FDA v. Brown & Williamson Tobacco Corp.*, 529 U.S. 120, 132 (2000). Yet legal corpus linguistics’ frequency hypothesis, by its very nature, would instead seek to settle such ambiguities by *stripping away* the context—and instead determining what an ambiguous word means in a particular text by asking how the word is used, a majority of the time, in *completely different* contexts. That is not how language works. As Professor Drakeman notes, “Constitutional corpus linguistics theorists employing the frequency thesis need to construct a persuasive argument for why constitutional meaning cannot be found in bona fide, well-attested usages simply because another usage occurs more frequently in documents having nothing to do with the Constitution.”¹¹

¹¹ Drakeman, *supra*, at 97-98; *see also* Carissa Byrne Hessick, *Corpus Linguistics and the Criminal Law*, 2017 BYU L. REV. 1503, 1508-10.

Indeed, some plainly accepted uses of a word may not appear in a corpus *at all*. For example, “[t]he blue pitta is a bird found in Asia but not North America. It is no less a bird, and we are no less comfortable calling it a bird just because it does not appear in corpora of American English.”¹² Similarly, although “in some corpora, there are no examples of airplanes being referred to as ‘vehicles,’ ”¹³ survey evidence overwhelmingly indicates that ordinary language users consider airplanes to be within the meaning of the word “vehicle.”¹⁴ Thus, while the claim that a particular use of a word does not appear at all “[i]n an *entire* corpus” “seems to have great rhetorical strength,” the argument is “fallacious” since “[l]egal corpus linguistics often neglects nonprototypical uses of a term.”¹⁵ Indeed, even two of legal corpus linguistics’ most prominent proponents have recently conceded that the fact that a “use ... is not reflected in a corpus (or is even only uncommonly reflected)” does *not* mean that it “cannot fall within the ordinary meaning of a studied term.”¹⁶

The conceptual difficulties with the frequency hypothesis do not end there. Even assuming that we should decide the meaning of a word or phrase in the Second

Amendment by counting noses, we still must know *how great* the preponderance of a particular meaning in the corpus must be before we declare it the “correct” one. Is it sufficient if 99 percent of instances go one way but the alternative meaning is nonetheless used in the remaining one percent? 85 percent? 50.1 percent? A plurality when there are several different available meanings? There is simply no theoretical basis for drawing the line at any of these percentages rather than the other.

B. The patterns of usage identified by corpus linguistics may merely reflect biases in favor of newsworthy or historically salient subjects.

Legal corpus linguistics suffers from another, related problem: a majority usage detected by the corpus linguistics method may be measuring essentially irrelevant social facts—*unrelated* to the meaning of the word or phrase at issue—that account for the predominance of one use in the corpus rather than another.

For example, many corpora contain large collections of newspaper articles.¹⁷ The content of newspapers is, almost by definition, predominantly focused on contemporary events of newsworthy significance. And the pamphlets and periodicals, correspondence of the Framers, federal and state convention proceedings, and legal texts that make up the “Corpus of Founding Era American

¹⁷ See “*Texts*,” Corpus of Historical American English (last visited Apr. 23, 2021), <https://bit.ly/3fVfZyb>; “*Texts*,” Corpus of Contemporary American English (last visited Apr. 23, 2021), <https://bit.ly/2PXiepw>.

English” (or “COFEA”) corpus generally used in Second Amendment research¹⁸ likewise necessarily focus on some types of topics or issues rather than others. The texts collected in available corpora are thus likely to contain a disproportionate number of some usages of words rather than others—not because the minority usages were considered incorrect, and not even necessarily because those usages *were* less common in contemporary language use, but simply because those usages were less common *in discussions of the types of topics that dominated the texts included in the corpora*. As Judge Stranch has written, corpus linguistics thus “risk[s] privileging the most *newsworthy* connotations of a term over its ordinary meaning.” *Wilson v. Safelite Grp., Inc.*, 930 F.3d 429 (6th Cir. 2019) (emphasis added) (Stranch, J., concurring).

Similarly, the content of corpora focused on a particular period of time—such as COFEA, which includes texts written between 1760 through 1799—will almost certainly be skewed by the contingent social and historical circumstances that dictated the various preoccupations of the language users during that time period. The last four decades of 18th century America, for example, were dominated by extraordinary military events and legal and constitutional upheaval. Certain senses of ambiguous words or phrases were very likely used disproportionately in the

¹⁸ See *About the Corpus, Corpus of Founding Era American English (COFEA)*, BYU (last visited Apr. 23, 2021), <https://bit.ly/32xnP9i>.

written texts that survive from this period, but these proportions may reflect the “topics of conversation,” as it were, that dominated contemporary writing because of the historical events of the day, not any fact about the prevailing or accepted meanings of those words in standard American English at the time.

Consider the word “airplane.” One would expect that an analysis of the uses of this word in a corpus drawn from the writings of a nation enduring a period of total war would show that the word was predominately used to refer to military aircraft—fighters, bombers, and the like—rather than civilian jumbo-jets or single-engine pleasure craft. By the logic of the frequency hypothesis, one would thus conclude that the “correct” meaning of the word, during this period in time, was confined to military airplanes. But that is of course nonsense. The meaning of the word “airplane” would not have *changed*, in this example; all that changed was the sort of topics that dominated the national discussion.

These considerations have serious implications for the use of corpus linguistics in analyzing the Second Amendment. Because of the social and historical context of the period covered by the prevailing COFEA corpus, it is likely to include intensive discussions of military battles and planning, militia service and training, constitutional theory, and the depredations of the British Government. Because of the *types* of texts encompassed, it is likely to include a disproportionate number of discussions of military strategy and tactics, the separation of powers, the proper

scope of the federal and state governments, and the rights and liabilities of the common law. What the corpus *is not* likely to contain, in any meaningful proportion, are accounts of the thousands of nameless farmers who bore their arms to hunt and kill game to feed their families, or the countless frontiersmen who had their muskets repaired so as to be prepared to defend their families and property from hostile attack.

C. The available corpora privilege elite over common usage.

A similar difficulty with any corpora of texts surviving from the late 18th century is that it is inevitably biased in favor of elite voices. Under *Heller*, the interpretation of the Second Amendment is tied to the common meaning of the words that would “have been known to ordinary citizens in the founding generation” and “understood by the voters.” 554 U.S. at 576-77. But the writings we have from this period in time were, in the main, not penned by these “ordinary citizens.” They were written by elites—the small, upper crust of individuals who drafted laws, attended constitutional conventions, or had the ability and inclination to collect and preserve their correspondence. Indeed, even the collection in COFEA that is identified by the proponents of legal corpus linguistics as mitigating this elitist bias—the Evans Early American Imprints collection of “books, pamphlets, and broadsides”¹⁹—is far from representative of ordinary late-eighteenth-century American discourse. The vast

majority of planters, tradesmen, and frontiersmen who used American English—to say nothing of enslaved peoples, indentured servants, or Native Americans—did not write and publish any books, pamphlets, or broadsides.

D. Legal corpus linguistics ignores the history and context of legal texts.

Another shortcoming of legal corpus linguistics is that it is incapable of recovering the deeper context of constitutional language. Indeed, the methodology critically depends on *decontextualizing* language use. That is at war with the traditional understanding of the originalist endeavor.

Originalism has always been understood as a contextual task, requiring the interpreter to “take the context in which a word or phrase appears into account, combined with how these words are used elsewhere in the document and the general purposes for these clauses that can be ascertained from the document itself and from circumstances surrounding its formation.”²⁰ Justice Scalia’s majority opinion in *Heller* is an exemplar of this feature of classic originalist interpretation. *Heller* begins with the bare semantic meaning of the Second Amendment’s various phrases, of course, but it hardly ends the analysis there. Rather, Justice Scalia goes on to meticulously analyze the ideological and historical context of the Second Amendment right, from the 1689 Declaration of Rights, through a “review of

²⁰ Randy Barnett, *An Originalism for Nonoriginalists*, 45 LOY. L. REV. 611, 633-34 (1999).

founding-era sources,” to an “examination of a variety of legal and other sources to determine *the public understanding* of a legal text in the period after its enactment or ratification.” *Id.* at 584, 593, 605.

Legal corpus linguistics, by contrast, provides an impoverished approach to interpretation—one that *by design* divorces language use from much of the historical and social context in which it occurs, in a search for bare, decontextualized linguistic patterns. This decontextualization is baked into the very nature of the methodology. The supposed *feature* of corpus linguistics, after all, is that it is a “data-driven inquiry” that is able to leverage the tools of “quantitative” analysis in the search for objective meaning.²¹ And the only way that the tools of “big data” can be employed is by collecting a large number of snippets of texts—shorn from their own contexts, and (by design) mostly taken from contexts that are *entirely alien* to the actual textual passage at issue—and then treating them all as carrying equal interpretive weight. But as Professor Stanley Fish has succinctly explained, “[o]nce you detach patterns [of language use] from the intentional context in which they have significance, you can’t get the significance back.”²²

²¹ Lee & Philips, *Data-Driven Originalism*, *supra*, at 289, 320.

²² Stanley Fish, *The Interpretive Poverty of Data*, BALKINIZATION (Apr. 20, 2021), <https://bit.ly/32ufVgz>.

Again, this shortcoming is evident in the context of the Second Amendment. The meaning of the Second Amendment has been a matter of sustained and intensive legal, historical, and linguistic study since at least the mid-1980s. During those decades, all of the *relevant* historical materials were identified, collected, and thoroughly analyzed in their historical context. The result was a deep understanding of the intellectual, cultural, and historical background and content of the Second Amendment—of the *ideas* of the Founders and their intellectual forebears. The central move of those who would use corpus linguistics to shed supposed “new light” on the Second Amendment is to *sweep away* all of this contextual information, and to pour new meaning into the provision—meaning drawn *not* from some newly-discovered *relevant* historical source, but rather from hundreds of textual snippets of documents *completely unrelated* to the right to keep and bear arms.

E. The purportedly quantitative nature of legal corpus linguistics may give it a false illusion of scientific objectivity.

Finally, there is a very real risk that the purportedly quantitative nature of the corpus-linguistics method will give its results a false façade of scientific objectivity, frustrating serious judicial scrutiny. The “data” and “findings” derived from legal corpus linguistics—dressed in all the trappings of mathematical rigor—may appear “scientific” and “objective” and, for that reason, entitled to deference that is totally unwarranted.

That possibility is all the more troubling because the appearance of objectivity that the quantitative nature of a corpus linguistics analysis bestows upon its findings is largely illusory. For all the effort by proponents of the method to construct a purely “objective inquiry into ordinary meaning”²³ that is “more rigorously empirical,”²⁴ the approach still centrally relies on the ability of individuals to accurately “code” each snippet of text identified by a corpus search—an endeavor subject to all the very same biases and limitations inherent in textual interpretation that the method is supposed to *escape*. In one recent corpus-linguistics analysis, for example, even though the two co-authors “practiced in order to facilitate consistent coding” and “then met to discuss why they had arrived at particular decisions,” they ultimately still agreed on “how to code a particular result” only “seventy percent of the time.”²⁵ As Professor Hessick concludes, “[i]f people who have specifically trained with one another to achieve consistent results nonetheless disagree with one another thirty percent of the time, then it is quite clear that corpus linguistics cannot give us ‘right answers.’”²⁶

III. If the Court nonetheless employs the corpus linguistics methodology in this case, it provides further confirmation that the challenged restrictions violate the Second Amendment.

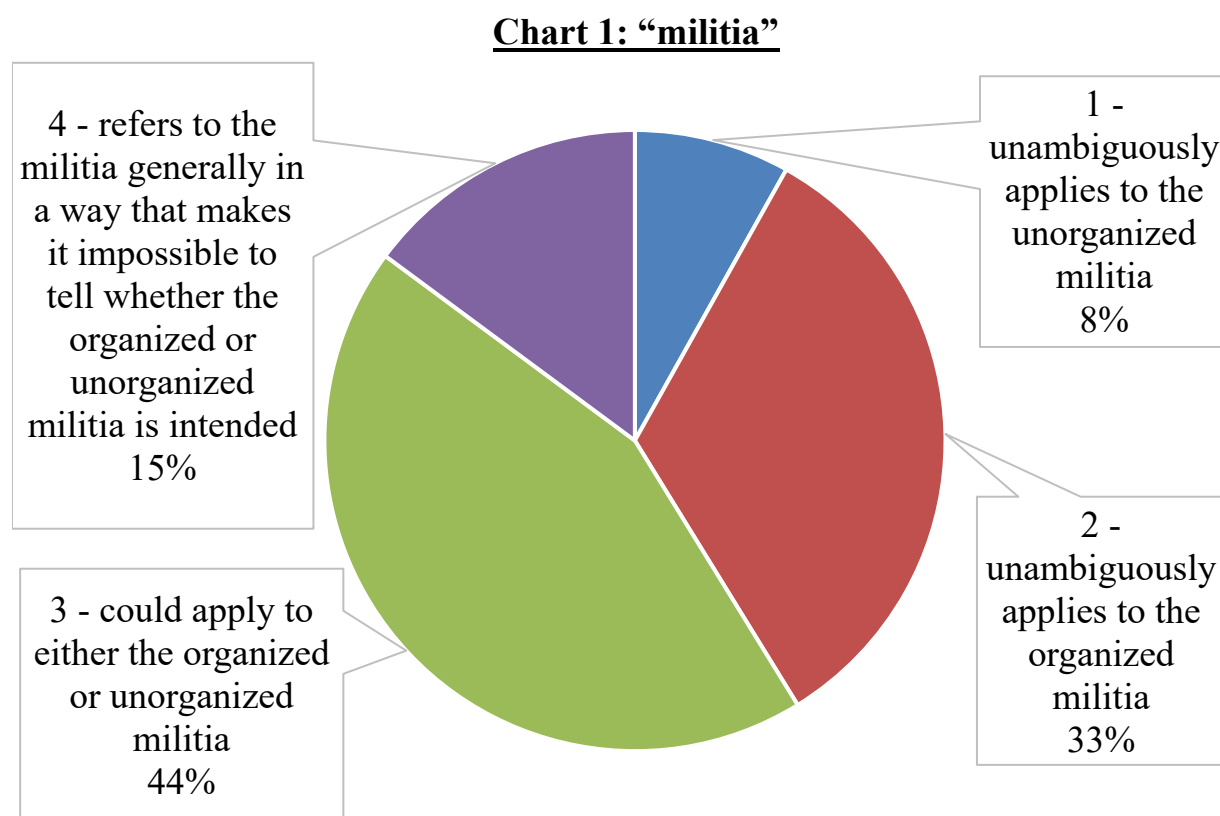

Should the Court decide to use the tools of corpus linguistics in determining the original public meaning of the Second Amendment phrases in question, notwithstanding the flaws just surveyed, it would not change the outcome of this case. In response to the Court’s Order, Plaintiffs performed a number of searches and analyses of COFEA related to the three phrases in question.²⁷ The results, described below, provide further confirmation of the original meaning of those phrases detailed above.

A. “A well regulated Militia.”

We performed a “sense differentiation” analysis of the word “militia” in an effort to shed light on whether the word was commonly used to refer to the body of all able-bodied men when the Second Amendment was ratified. For this analysis, we searched COFEA for all instances of the word “militia” in the corpora, derived a random sample of 150 “concordance lines” from the results, eliminated any duplicate lines or irrelevant uses of the word, and then had the results coded into one

²⁷ *Corpus of Founding Era American English (COFEA)*, BYU (last visited Apr. 23, 2021), <https://bit.ly/32xnP9i>. While the Court’s Order identified two other corpora—the Corpus of Historical American English (which includes data starting in 1810) and the Corpus of Contemporary American English—there appears to be a consensus that COFEA is the best corpus for discerning the original public meaning of words or phrases in the original Constitution and Bill of Rights. See Lee & Phillips, *Data-Driven Originalism*, *supra*, at 293-96.

of four categories: (1) unambiguously applies to the unorganized militia; (2) unambiguously applies to the organized militia; (3) could apply to either the organized or unorganized militia; or (4) refers to the militia generally in a way that makes it impossible to tell whether the organized or unorganized militia is intended.²⁸ The results are set forth in the Appendix at page App1 and are summarized in the following chart:

As this chart indicates, while a minority of instances in our sample unambiguously referred to either the “unorganized” or “organized” militia, to use

²⁸ The initial search for “militia” returned a total of 20,680 concordance lines. After deriving a random sample of 150 results, we excluded 0 duplicates and 2 uses that were deemed irrelevant.

Heller's terminology, a clear plurality of instances used the word in a way consistent with either the narrower or the broader usage—and taken together, a slim majority of instances (52%) were either clear examples of the “unorganized” militia sense or were consistent with that sense. Based on this evidence, neither the “organized” nor the “unorganized” sense of “militia” can be declared the predominate use of the word at the Founding.

Several of the texts in the COFEA corpus establish that “militia” was indeed routinely used at the time of the Founding to refer to “all able-bodied men.” *Heller*, 554 U.S. at 596. For example, a search for “militia” in proximity to the word “whole” reveals a 1777 letter from then-General George Washington to the Pennsylvania Council of Safety, stating that “it is absolutely Necessary, that Every person able to bear Arms (except such as are conscientiously scrupulous against it in every case) should give their personal service,” and that “[i]n order to effect this, I beg you will order the Whole Militia of your State to be enrolled & Completely equip[p]ed”²⁹ Similarly, the results of a search for “militia” in proximity to the word “people” include a letter from John Adams to the Abbé de Mably explaining that “[t]he Militia

²⁹ Letter from George Washington to the Pennsylvania Council of Safety (Jan. 19 1777), in 8 THE PAPERS OF GEORGE WASHINGTON, REVOLUTIONARY WAR SERIES 107 (Frank E. Grizzard, Jr. ed., 1998), available at <https://bit.ly/3sgnlhT>.

comprehends the whole People,” including “every Male Inhabitant between Sixteen and Sixty Years of Age.”³⁰

Moving close to the context of the use of “militia” in the Constitution itself, the same search reveals an enlightening exchange in the Virginia ratifying convention, in which George Mason asked rhetorically “Who are the militia? They consist now of the whole people, except a few public officers.”³¹

Finally, additional evidence from COFEA strongly confirms that in the specific context of the Second Amendment, the phrase “well regulated militia” refers to the body of all able-bodied men, just as *Heller* holds. A search for “militia” in proximity to the word “body” returns, for example, the Virginia ratifying convention’s recommended amendments to the Constitution, the seventeenth of which proposed that “the people have a right to keep and bear arms; that a well-regulated militia, *composed of the body of the people trained to arms*, is the proper, natural, and safe defence of a free state.”³² And another of the hits returned from this search is a portion of the Bill of Rights as originally proposed by James Madison in the House of Representatives, which provided: “A well regulated militia, *composed*

³⁰ Letter from John Adams to the Abbé de Mably (Jan. 15, 1783), in 14 THE ADAMS PAPERS 172 (Gregg L. Lint *et al.* eds., 2008), available at <https://bit.ly/3mDOzOk>.

³² *Id.* at 659 (emphasis added).

of the body of the people, being the best security of a free state, the right of the people to keep and bear arms shall not be infringed; but no person religiously scrupulous shall be compelled to bear arms.”³³

The results of a corpus linguistics analysis are thus, at a minimum, consistent with *Heller*’s holding—and searching the COFEA corpus as a database of historical sources returns several primary historical sources that strongly confirm *Heller*’s interpretation of the phrase’s original meaning.

B. “The right of the people.”

We next conducted analyses of the word “right,” the phrase “the people,” and the word “right” in proximity to the word “people,” in an effort to determine whether this Second Amendment phrase encompassed people under the age of 21. Again, for each of these analyses, we searched COFEA for all instances of the word or phrase in question, derived a random sample of 150 “concordance lines” from the results of each of the searches, eliminated any duplicate lines or irrelevant uses, and then had the results coded into one of four categories: (1) unambiguously refers only to people over the age of 21; (2) unambiguously includes people under the age of 21; (3) used in a way that could include people under the age of 21; or (4) no way to determine

³³ 1 ANNALS OF CONG. 778 (1789) (Joseph Gales ed., 1834).

what ages are referenced.³⁴ The results are set forth in the Appendix at pages App6, App14, and App22, and are summarized in the following charts:

Chart 2: “right”

³⁴ The searches involving the word “right” also searched for words that share the same *lemma* as “right,” such as the plural “rights.” The initial search for “right” returned a total of 66,757 concordance lines. The initial search for “the people” returned a total of 57,000 concordance lines. The initial search for “right” within six words of “people” returned a total of 1,196 concordance lines. 0 duplicates and 58 irrelevant uses were excluded from the analysis of “right,” 0 duplicates and one irrelevant use were excluded from the analysis of “the people,” and 0 duplicates and 34 irrelevant uses were excluded from the analysis of “right” within six words of “people.”

Chart 3: “the people”

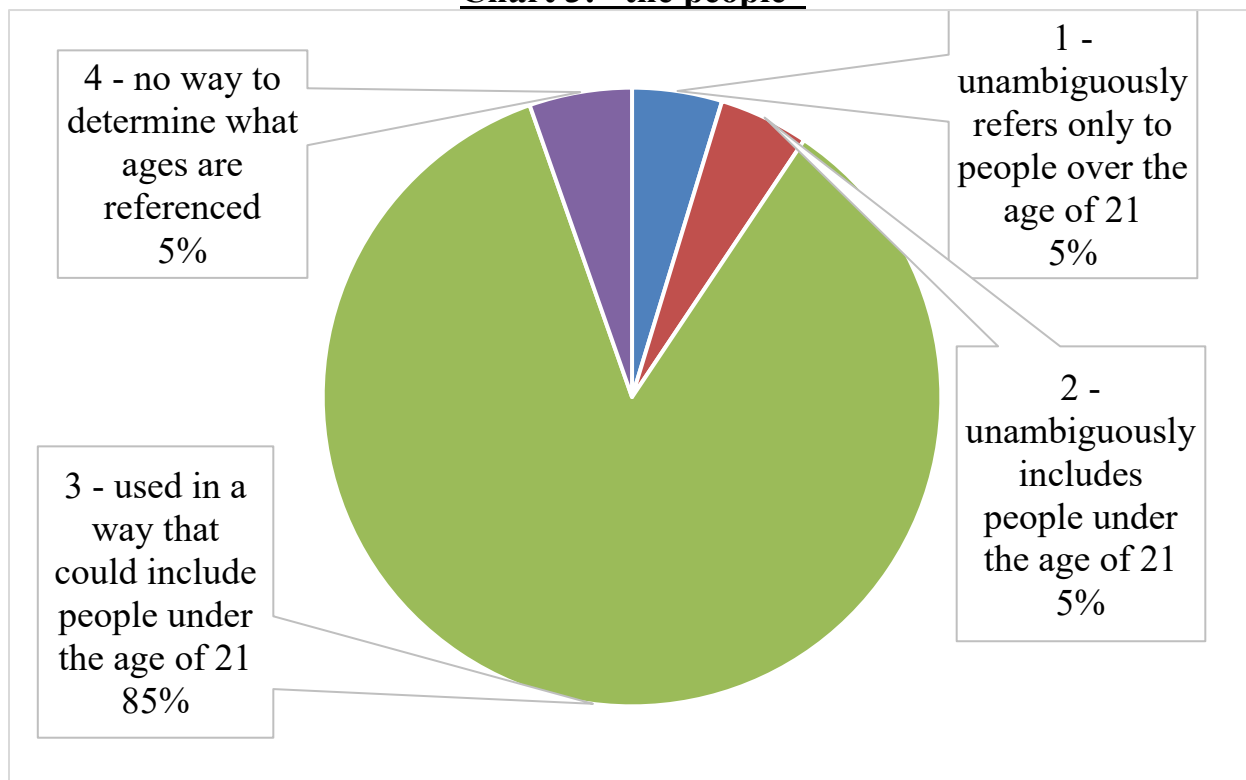

Chart 4: “right” near “people”

As these charts demonstrate, the vast majority of the results of all three searches either unambiguously included people under 21 years old or were consistent with including people in that age group. Approximately 34% of the instances of the word “right” either clearly or potentially included people under 21—consistent with the fact that while some rights at the Founding were limited to people aged 21 and over, not all were. And the results for the phrase “the people”—both alone and in proximity to the word “right”—are even starker. In an overwhelming majority of cases—90 percent when “the people” was used alone, and 92 percent when it was used in conjunction with “right”—the phrase “the people” was used in a way that either clearly included people of any age or was consistent with the inclusion of people of any age.

Again, *Heller* conclusively resolves the original public meaning of the phrase “right of the people.” But far from engendering any skepticism about *Heller*’s interpretation, a corpus linguistics analysis of the phrase “right of the people,” and its constituent parts, in fact strongly suggests that *Heller*’s interpretation is correct.

C. “Shall not be infringed.”

Finally, we also performed analyses of the word “infringe,” both on its own and in proximity to the word “right,” to determine whether it was commonly used to refer to limitations short of a complete ban. The search for “infringe” alone returned 950 results, and we analyzed a random sample of 150 of them; the search for

“infringe” near “right” returned 55 results, and we analyzed all of them. In each case, we had the results coded into one of four categories: (1) unambiguously limited to total bans or destruction of the right; (2) unambiguously includes restrictions short of a total ban; (3) refers generally to restrictions or limitations in a way that could include restrictions short of a total ban; or (4) no way to determine what types of restrictions are referenced.³⁵ The results are set forth in the Appendix at pages App30 and App37 and are summarized in the following charts:

Chart 5: “infringe”

³⁵ Both searches also searched for words that share the same *lemma* as “infringe” or “right,” such as “infringed,” “infringement,” or “rights.” 0 duplicates and 6 irrelevant uses were excluded from the analysis of “infringe,” and 6 duplicates and one use which reproduced the text of the Second Amendment were excluded from the analysis of “infringe” within six words of “right.”

Chart 6: “infringe” near “right”

The results provide powerful confirmation that the original meaning of the term “infringe” includes restrictions short of an absolute ban on the exercise of the right in question. 56 percent of the analyzed uses of “infringe” *unambiguously* included lesser restrictions—and another 42 percent were consistent with the inclusion of such lesser restrictions—with only one percent of the instances analyzed clearly referring to a total ban or destruction of the right at issue. The results for “infringe” used in conjunction with the word “right” are similar.

There can be no doubt that the Second Amendment’s command that the rights it protects “shall not be infringed,” as originally understood, encompasses a severe

infringement like the restrictions on firearm acquisitions imposed by California in this case.

CONCLUSION

The original meaning of the Second Amendment confirms that the Court should reverse the decision below.
